

PRACTICAL 2:

```
uname -m  
objdump -d /bin/ls | head -n 20  
echo 'int main() { return 0; }' > test.c  
gcc -g test.c -o test  
gdb ./test  
break main  
run  
info registers rip  
step  
info registers rip  
quit
```

PRACTICAL 3:

```
nasm -f elf64 add_numbers.asm -o add_numbers.o  
ld add_numbers.o -o add_numbers  
./add_numbers
```

PRACTICAL 4:

```
nasm -f elf64 subtract.asm -o subtract.o  
ld subtract.o -o subtract  
./subtract
```

PRACTICAL 5:

```
nasm -f elf64 logic.asm -o logic.o  
ld logic.o -o logic  
./logic
```

PRACTICAL 6:

```
nasm -f elf64 simulate.asm -o simulate.o  
ld simulate.o -o simulate
```

./simulate

PRACTICAL 7:

python3 simulate.py

PRACTICAL 8:

nasm -f elf32 simulation.asm -o simulation.o

ld -m elf_i386 simulation.o -o simulation

gdb ./simulation

break _start

run

step

step

step

info registers

quit

PRACTICAL 9 (CIR):

nasm -f elf64 cir.asm -o cir.o

gcc cir.o -o cir -no-pie

./cir

PRACTICAL 9 (CIL):

nasm -f elf64 cil.asm -o cil.o

gcc cil.o -o cil -no-pie

./cil

PRACTICAL 10:

nasm -f elf64 sum.asm -o sum.o

ld sum.o -o sum

./sum

PRACTICAL 11:

```
nasm -f elf64 sum_zero.asm -o sum_zero.o
```

```
ld sum_zero.o -o sum_zero
```

```
./sum_zero
```
